

## Press Release

### Lightip Technologies obtained ISO 9001 and ISO 14001 certifications

**Hangzhou, China, August 30, 2017** - In order to improve the quality of products and to standardize services, Lightip launched a comprehensive implementation of ISO9001 quality and ISO14001 environmental management systems in March 2017. With the great efforts of employees and after comprehensive, strict and careful audit of certifying experts, it is confirmed that Lightip's quality management system is in accordance with ISO9001:2015 quality and ISO14001:2015 environment management system standards. In August 2017, the company successfully completed the external audit, and obtained the certificates from the international authority SGS certification institution.

The establishment and implementation of the standardized ISO series of management systems improve the company's quality consciousness, standardize the production process, and effectively control the risks. They also improve the efficiency of the company management by using a standardized model, establishing a better set of quality control and quality assurance systems in management, market operation and services management. They will help the company to continuously improve the management, establish a good corporate credibility, and is of great significance to the long-term development of the company.
